

## **Attention Parents/Guardians of Lakeside Middle School Students**

**2015-2016**

Our district is once again offering the HPV vaccine to students at our school-located vaccine clinics. The HPV vaccine is the only vaccine that has been **proven to prevent** certain types of cancers that can affect both boys and girls.

This vaccine is given as a three shot series. A signed consent is required for each dose of the vaccine. Vaccine clinics are offered monthly at Lakeside Middle School.

If you have a child who attends Lakeside School and you are interested in having him/her receive this vaccine, please have your student pick up a consent in the main office at Lakeside School. Consents should be returned to the school nurses at Lakeside. If your child has already received one or two doses, they can receive the additional doses at our on-site clinic.

Students will be monitored by a registered nurse for 15 minutes after receiving the vaccine.

If you have any questions, concerns, or would like more information, please feel free to contact me at 856-293-2000, extension 3864.
